

What is claimed is:

1. An image forming device comprising:  
an image reading apparatus which reads an original document;  
an image recording apparatus which records onto paper, image  
information read by the image reading apparatus;  
a control unit which has a control board for controlling the  
image reading apparatus and the image recording apparatus; and  
a supporting table;  
wherein the control unit is attached as a part of the supporting  
table.
2. The image forming device according to claim 1, wherein the  
control unit is attached as a reinforcing part which is provided on  
a rear side of the supporting table.
3. The image forming device according to claim 1, wherein the  
control unit is attached as a supporting part which is provided on  
an upper surface of the supporting table.
4. The image forming device according to claim 3, wherein the  
control unit includes an operation panel.
5. The image forming device according to claim 4, wherein the  
operation panel is detachably attached to the control unit.

6. The image forming device according to any one of claims 1 through 5, wherein the image reading apparatus is disposed on the supporting table, and the image recording apparatus is disposed in the supporting table.

7. The image forming device according to any one of claims 1 through 5, wherein the image reading apparatus and the image recording apparatus are disposed on the supporting table.

8. The image forming device according to any one of claims 1 through 5, wherein a cover, which can be opened upward, is provided on an upper part of the image recording apparatus.
